## **What are company principles?**

**1) Create clear, appropriate investment goals: An appropriate investment goal should be measureable and attainable. Success should not depend on outside investment returns or impractical saving or spending requirements.**

**2) Develop a suitable asset allocation using broadly diversified funds: A sound investment strategy starts with an asset allocation befitting the portfolio's objective. The allocation should be built upon reasonable expectations for risk and returns and use diversified investments to avoid exposure to unnecessary risks.**

**3) Minimize cost: Markets are unpredictable. Costs are forever. The lower your costs, the greater your share of an investment's return. And research suggests that lower-cost investments have tended to outperform higher-cost alternatives. To hold onto even more of your return, manage for efficiency. You can't control the markets, but you can control the bite of costs and efficiency.**

**4) Maintain perspective and long-term discipline: Investing can provoke strong emotions. In the face of market turmoil, some investors may find themselves making impulsive decisions or, conversely, becoming**

**paralyzed, unable to implement an investment strategy or rebalance a portfolio as needed. Discipline and perspective can help them remain committed to a long-term investment program through periods of market uncertainty.**

**How can i ask for support?**

**We are here to help you with any problems and questions you may encounter while using the platform and during your investment experience. You can always contact or turn the situation into an opportunity**
